

## PRESS RELEASE For release on April 23rd, 2020

### Innoactive announces an open-source version of its authoring toolkit for real-time VR training simulations

Innoactive invites enterprises and XR studios to use and grow the open-source community edition of its Unity-based Innoactive Creator, a toolkit trusted by enterprises such as the Volkswagen Group, BSH (Bosch Siemens Home Appliances), Lufthansa and others.

Munich, GER (April 23, 2020) – Innoactive, Europe’s leading VR training software startup, announces its open-source version of their Virtual Reality (VR) training authoring toolkit, Innoactive Creator. The toolkit caters to industrial enterprises and XR studios, enabling them to standardize and scale the creation of real-time VR training applications collaboratively.

“For the Linde Virtual Academy users, it is crucial to have a standard UI/UX in every VR training we offer as we scale. The Innoactive Creator enables us to create reusable templates which can be used and extended by our partner studios to deliver high quality VR scenarios without jeopardizing the standards.” says Feras Althohali, Innovation Manager at Linde Plantserv® part of the Linde Group.

Developed in close [collaboration with Audi](#) and other enterprise customers, the Unity-based toolkit empowers training designers to create fully immersive process-based training simulations without any programming skills. They start with a base template that pre-defines the style of the training, then simply add the training steps and specifications in a visual editor, within a few hours. This base template is fully customizable and extensible by code and is the core element that enables enterprises to standardize their training apps. Not only do they get to reuse features and code across projects, they can also flexibly extend their templates whenever process variations or new requirements emerge.

## Innoactive.

„Our goal at AeroGround with this VR Platform is to bring best practice training skills to all ground handlers out there, which we developed together with our partner Fraport Ground Services. The Innoactive Creator enables us to easily adapt the VR training scenarios to fit the process variations of the different operators and airlines.” says Christian Stoschek, Managing Director at AeroGround Flughafen München GmbH at Munich Airport.

Typically, enterprises create VR training apps in strong collaboration with XR studios. The Innoactive Creator enhances this collaboration by allowing them to jointly develop a template and use it as a base for all the subsequent training apps.

“It’s so much easier to align with our customers on a template, then implement the training logic and be sure the result will meet the expectations. We are much more efficient, with less iterations required, and high reusability of code across our projects. This is exactly what the XR world needs right now – more industrialization on usages that have proven their ROI.”, says Guillaume Taccoen, Innovation Manager at On-X Group, one of Innoactive’s trusted partners.

The community edition offered as an open-source version of the Innoactive Creator is an invitation addressed to XR studios and enterprises to benefit from the current features and contribute to a communal effort to set the standards for process-based VR training and to scale the production of such content. All interested parties can visit [Innoactive’s website](#) to get access to the software, documentation and webinars.

### About Innoactive GmbH

Founded in 2013, Innoactive is the leading European VR software company that helps enterprises to streamline their transformation of employee training with VR. Innoactive’s tools enable industry leaders to standardize and scale the creation and rollout of real-time VR learning experiences. The Volkswagen Group, Linde, Lufthansa, Deutsche Bahn, Fraport, AeroGround at Munich Airport are some of the visionary customers trusting Innoactive. At the core of the company stands a team of forward thinkers based in Munich, driven by the purpose of bringing VR to every industrial workplace: [innoactive.de/Creator](https://innoactive.de/Creator)

### About Linde Group

Linde is a leading industrial gases and engineering company with 2018 pro forma sales of USD 28 billion (EUR 24 billion). The company employs approximately 80,000 people globally and serves customers in more than 100 countries worldwide.

## Innoactive.

Linde delivers innovative and sustainable solutions to its customers and creates long-term value for all stakeholders. The company is making our world more productive by providing products, technologies and services that help customers improve their economic and environmental performance in a connected world. For more information about the company, please visit [linde.com](https://www.linde.com).

### **About AeroGround Flughafen München GmbH**

AeroGround Flughafen München GmbH offers along with the subsidiary AeroGround Berlin GmbH all landside and airside services for aircraft, baggage and passenger handling at Munich Airport and Berlin's Tegel and Schönefeld airports. Around 2,900 experienced employees take care of the handling of over 150 customers in the aviation industry every year. In detail this means: over 300,000 aircraft movements, 26 million pieces of luggage and 40 million passengers. AeroGround stands out with its individualized solutions, secure and reliable services and professional, integrated processes. For more information about the company, please visit [aeroground.de](https://www.aeroground.de)

### **About Fraport Ground Services**

[Fraport Ground Services](#) offer the highest level of terminal and airside services tailored to the specific needs of our customers and we are renowned for our individual and creative solution. With over 60 years of experience in ground handling and a highly trained and motivated workforce of more than 9,000 employees, we provide safe, professional and reliable processes for more than 80 national and international airlines and over 400,000 movements per year at Frankfurt Airport.

Coordinated processes, qualified staff and state of the art equipment guarantee Fraport customers the highest level of flexibility and reliability to turn around their aircraft on time – no matter the type of aircraft or freight. Our commitment to high quality is guaranteed by the continuous evaluation of agreed quality standards and service levels organized by dedicated customer service managers.

### **About On-X Group**

ON-X, independent French consultancy and expertise firm, specializes in the integration of digital technology for companies, government agencies and local authorities. Profiting of 30 years of experience and three agencies (Paris, Toulouse, Montbéliard) to meet these new challenges, our firm is organized around 5 competence centers that support customers successively to define the transition strategy, to accomplish main stages of decision support, to design and drive their implementation projects and finally to control the services delivered. Our mission: to serve our customers in the long term, be a decisive player in the definition and implementation of digital transformation projects.
